

Fourth Generation: Badminton sports floor

Grade : International environmental competition level.

Fixing way : a) Movable type.

b) Hot sol fixed type.

c) All fixed type

The color : The mint green

Certification : SGS environmental organizations through the international certification.

Length : 16m x width 8.1m x 3.9mm (made of 3 rolls)

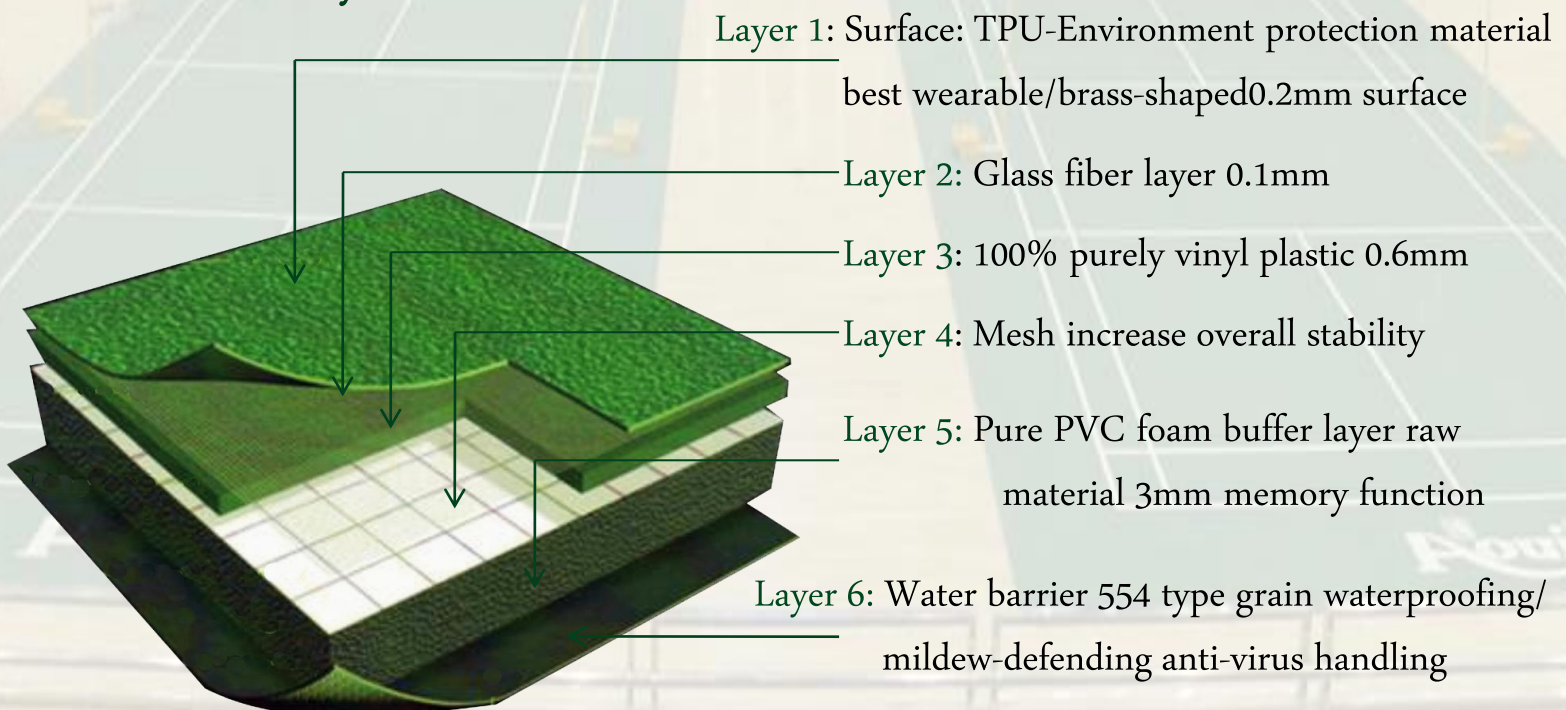

Confirmation :

The first layer: Sward-shape surface, even and accordant, 100% TPU made up, And the best wear resistance and durability, friction index balanced, effective photometric. Sward-shape surface to provide the best for the athletes safety and ccomfort.100% uniform friction, ensure that the foot of safety and freedom of movement, increased competitive level athletes.

The second layer: 1000D glass fiber layer, to ensure that movement of the products in the progress of stability and firm size ,and has played the role of automatic reinforcement.

The third layer: Single pore closing type construction,100% TPU bottom. The impact of increased absorptive capacity of the athletes and the energy release in space, play a sound , easy to clean, inhibit bacteria.

AY-01 Production: 6Layers Structure:

Shiv Naresh Sports Pvt. Ltd

Features

Application: This product is mainly suitable for badminton courts of any formation of ground-based (such as ; cement, marble and tile and terrazzo, etc...)

Stability: Added to the product structure of glass fiber reinforced 1000D network, to ensure that movement of the products in the process of stability and firm size and has played the role of automatic reinforcement.

Solidity: Bottom layer of foam with 554-type lines, the weight of a reasonable way in the venue after the combination of artificial tube will be used to roll contact with the ground floor between the exhaust air to form a relative vacuum, and more with adhesion in a more stable movement.

Comfort: Venue with a special surface treatment, in line with the brightness of light, reflective light and glare will not smoke, can better protect the athlete's eyes, not easy to produce fatigue, the total thickness of 3.9mm, with an appropriate buffer layer of foam for the bottom to make it more with shock absorption and rebound. Effectively reduce the impact of athlete's legs, feet feel comfortable and better to avoid the sports injury and improve the level of athletes to play.

Durability and wear resistance: Site using 100pure high quality PVC material, boundary layer of high-tech environmental protection TPU, and the best durability and wear resistance, thus increasing the life of floor.

Installation method: There are three types of installation methods. (a) Movable , (b) Hot sol fixed floor. © All fixed types. Customers' the floor will be selected for installation.

Sound-absorbing: The bottom of the standard thickness, with a suitable and reasonable reaction of shock-absorbing, sounds good.

Installation Method:

Nylon postern moveable (exclusive)

Production Specification:

Length : 16m

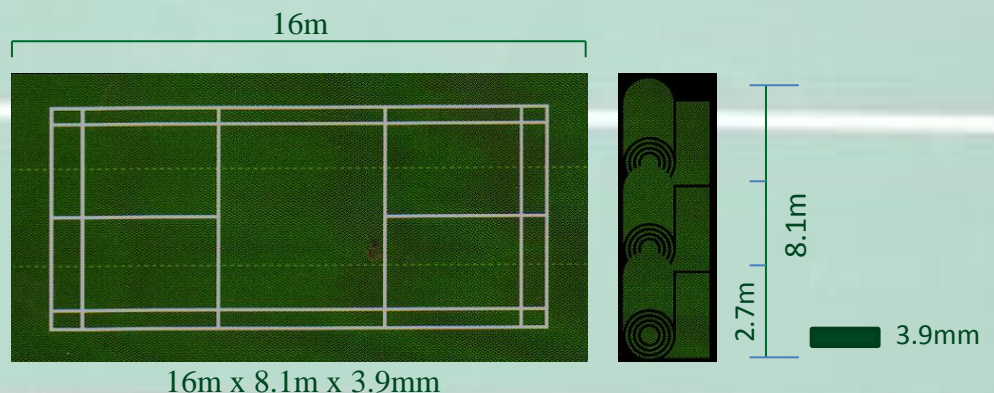

Width : 2.7m x 3 Pcs = 8.1m

Thickness: 3.9mm

AY-01: Badminton Sports Flooring

Color: Mint Green
