

Product Features:

Surface Layer TPU moving floor high wear resistant
Material have the best wear resistance and durability.

AY-V01: Volleyball Sports Flooring

The Color: Tangerine

Installation Method :

- a) Hot melt half-fixed. b) Fixed-wide.

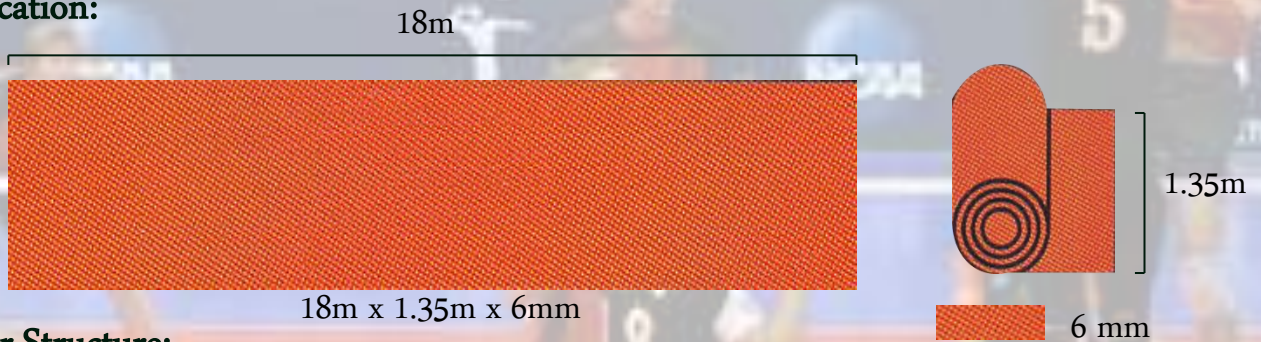

Grade : International environmental competition level.

Color : Recommended color light Orange /on demand..

Certification : SGS environmental organizations through the international certification.

The size : length: 36m x width: 21m (be constitute of 30 pieces, each in length 18m x width 1.35m)

Production Specification:

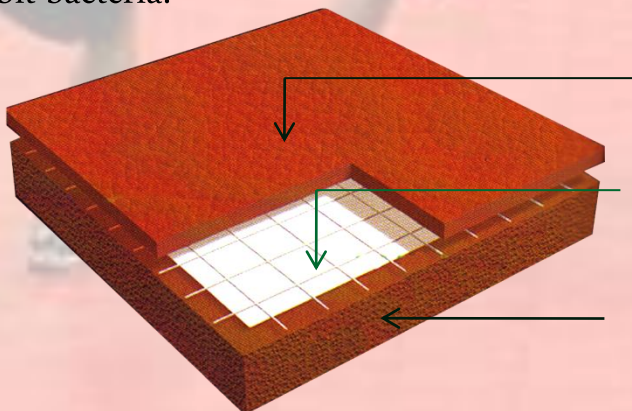

Production 3 Layer Structure:

The first layer: Sward-shape surface, even and accordant, 100% TPU made up, And the best wear resistance and durability, friction index balanced, effective photometric. Sward-shape surface to provide the best for the athletes safety and comfort. 100% uniform friction, ensure that the foot of safety and freedom of movement, increased competitive level athletes.

The second layer: Glass fiber layer, to ensure that movement of the products in the progress of stability and firm size, and has played the role of automatic reinforcement.

The third layer: Single pore closing type construction, 100% PVC bottom. The impact of increased absorptive capacity of the athletes and the energy release in space, play a sound , easy to clean, inhibit bacteria.

Surface: TPU Environment protection material best wearable/ Shape grain 1mm surface.

Second Layer: Glass Fiber Layer mesh increase overall stability.

Third layer: Single pore closing type construction 100% PVC bottom layer 5mm.
